EXPERIENCE

Surge-ERP, Markham, ON — Graphics Designer

FEB 2019 - FEB 2020

Utilized Adobe Photoshop and Adobe Illustrator to design and create company branding material, promotional event material and game development artwork. Created and managed additional website design aspects on Wordpress. Worked with ReactJS, Node.js and Python to perform image manipulation. Used Shotcut to create a promotional video for upcoming project releases while collaborating with other Graphic Designers.

PROJECTS

[Weather Checker](#) — React.js, Node.js

Uses ReactJS and a Node.js Express server to get the weather forecast of a specific location. Also the location is saved using cookies for faster future uses.

[Watch List](#) — HTML, CSS, JavaScript, Node.js

A website which allows users to store movies and TV shows they would like to watch. Uses an Express.js server and MySQL database to store data. Hosted using AWS Elastic Beanstalk.

[Car Price Predictor](#) — Python

Uses multiple regression based on the mileage and number of cylinders from a data sheet of car information. When given an input of mileage and number of cylinders predicts the worth of the car.

[Flowfina](#) — React.js

Uses ReactJS and a Firebase backend to help plan out financial goals. Uses Cloud Functions to keep track of payments and interest applied to the goal.
