EXPERIENCE

Surge-ERP, Markham, ON — *Graphics Designer*

FEB 2019 - PRESENT

Utilized Adobe Photoshop and Adobe Illustrator to design and create company branding material, promotional event material and game development artwork. Created and managed additional website design aspects on Wordpress. Worked with ReactJS, Node.js and Python to perform image manipulation. Used Shotcut to create a promotional video for upcoming project releases while collaborating with other Graphic Designers.

SKILLS

Javascript

React.js

Java

Python

Photoshop

Illustrator

PROJECTS

Flowfina — *React.js*
Visit Website: https://flowfina.com/

Uses ReactJS and a Firebase backend to help plan out Financial Goals. Uses Cloud Functions to keep track of payments and interest applied to the goal.

Weather Checker — *React.js*
Visit Website: https://kennysweatherchecker.herokuapp.com/

Uses ReactJS and a Node.js Express server to get the weather forecast of a specific location. Also the location is saved using cookies for faster future uses.

Movie Recommender — *Python*

A Python script which recommends movies based on your ratings using the technique of Item-Based Collaborative Filtering. Using the Panda library, the script creates a dataframe which stores the correlation of each movie pair with their ratings from other users. Then finds movies which have the highest correlation when scaled by the input.

Car Price Predictor — *Python*

Uses multiple regression based on the mileage and number of cylinders from a data sheet of car information. When given an input of mileage and number of cylinders predicts the worth of the car.

EDUCATION

Lassonde School of Engineering, York University
North York, ON
B.Sc., Hons. Computer Science
April 2021
